

## SAILSAFE™ HEALTH AND SAFETY PROGRAM

Our vision is to be the vacation of choice for everyone around the world. That's why we've enhanced our commitment to your well-being while cruising with our **SailSAFE™ Health and Safety Program**. Creating what we believe is a uniquely safe and healthy vacation experience, our SailSAFE enhanced protocols create multiple layers of protection against COVID-19 for our guests, crew and the communities we visit. The robust, science-backed strategy was developed in conjunction with a diverse group of globally recognized experts, including the **SailSAFE™ Global Health & Wellness Council**, and is continuously evaluated using the latest science and technology.

## SAFETY FOR OUR GUESTS & CREW

### PRE-CRUISE VACCINATIONS, SCREENING & CHECK-IN

#### VACCINATION PROTOCOLS

- For all voyages, **subject to specific local health regulations**:
  - **Fully vaccinated** guests are not required to test prior to embarkation.
  - **Unvaccinated guests** may embark with evidence of a negative COVID-19 PCR or Antigen test from a registered test provider taken within 3 days prior to embarkation (please see "Additional Pre-Embarkation Health Screening" section for more information).
  - Vaccination and testing requirements, and the definition of what is considered "fully vaccinated", may differ according to specific local health regulations, with some destinations requiring a "booster" dose to fulfil the definition of "fully vaccinated".
  - Unvaccinated guests may be required to test occasionally throughout the voyage if deemed necessary by local authorities. Guests would be responsible for the cost.
  - **Vaccination and testing requirements will be highlighted to guests approximately 30-days prior to sailing.**
- Proof of vaccination should be the original vaccination record document issued by either the country's health authority that administered the vaccination or the guest's medical provider that completed the vaccine administration; however, a photo of vaccination record document will also be accepted.
- Electronic vaccination records will be accepted for residents of countries where electronic documentation is the standard issued form. Confirmation email of vaccination appointment will not be accepted. For more details on vaccinations and answers to Frequently Asked Questions, please [click here](#).

#### ADDITIONAL PRE-EMBARKATION HEALTH SCREENING

- All guests will undergo pre-embarkation health screening including an enhanced health questionnaire and touchless temperature check.
- Proof of a negative COVID-19 test result from a registered test provider taken within a specified timeframe at embarkation will be required in the following instances:
  - When specific local health regulations require pre-embarkation COVID-19 testing for both fully vaccinated and unvaccinated guests
  - When a guest is deemed to be unvaccinated
- **Testing requirements for both fully vaccinated (if any) and unvaccinated guests will be highlighted to guests approximately 30-days prior to sailing.**
- When tests are required, guests must provide proof of a negative COVID-19 test result from a registered test provider (printed or digital) taken within a specified timeframe at embarkation and should travel with a copy of their test result.
- Test result documentation must be provided in English and must include the following information:
  - Your name, which should match the name on your travel documents
  - Your date of birth
  - The result of the test
  - The date the test sample was collected
  - The name of the test provider
  - Confirmation of the type of test provided
- Should guests require assistance finding a COVID-19 testing location prior to departing home or while traveling, please visit the Test for Travel website by [clicking here](#).
- Additionally, we have partnered with Inspire Diagnostics to provide hassle-free, online testing for our guests from the convenience of their home or hotel they may be staying at prior to boarding our ship. Choosing this option will allow guests to receive an antigen test kit via mail, which they will self-administer while being proctored by a medical professional, with results back in about 10 minutes. Please [click here](#) for more information about Inspire Diagnostics and please note that only test results from certified laboratories will be accepted by the Greek health authorities. Anything else such as self-tests or procedures via "zoom" (including from Inspire Diagnostics) will be automatically rejected by Greek authorities.
- As the entry requirements by country continue to evolve, we recommend that all guests consult with local government websites to determine any additional requirements that may be required to travel.

## SOCIALLY RESPONSIBLE CHECK-IN

- We've designed an enhanced, staggered embarkation process and new check-in system to streamline check in for guests by allowing documents to be signed electronically.
- Additionally, embarkation terminals will be disinfected continuously, and where possible, fogged before and after each embarkation and debarkation.

---

## SAFETY ABOARD OUR SHIPS

### ONBOARD — INCREASED SANITATION MEASURES, UPGRADED AIR FILTRATION SYSTEMS, ENHANCED MEDICAL TEAMS & FACILITIES

## HAND SANITATION

- All guests will be required to engage in frequent handwashing.
- Hand sanitizer will be prominently placed and easily accessible throughout the ship.

## ONBOARD HEALTH MONITORING FOR GUESTS & CREW

- Temperature checks and ongoing symptom screening will be practiced throughout the cruise.

## CONTINUOUS SHIP-WIDE CLEANING AND DISINFECTION MEASURES

- Comprehensive enhanced cleaning and sanitation protocols have been implemented throughout the cruise experience.
- Our 24/7 prevention schedule features continual disinfection of public areas and high-traffic touch points using EPA-approved disinfectants.
- Guest accommodations will receive intensive non-toxic microbial disinfection daily.

## UPGRADED MEDICAL-GRADE AIR FILTERS

- To provide cleaner air for our guests we have strategically installed medical-grade air filters of the highest filtration grade, MERV 13 or HEPA according to the type of HVAC system installed on board.
  - The upgraded H13 HEPA air filters are capable of removing 99.9% of airborne pathogens, including SARS-CoV-2 (coronavirus), the virus that causes COVID-19.
  - A new air treatment technology, bio-polar ionization, has been adopted to continuously disinfect the air in occupied spaces.
-

### ENHANCED ONBOARD MEDICAL TEAMS & HEALTH SERVICES

- We've improved our onboard medical capabilities with additional staffing relative to capacity and enhanced facilities. This includes an increase in intensive care unit capacity, new and upgraded equipment, onshore medical institution partnerships, telemedicine capabilities and additional robust consultation and treatment options.
- Onboard medical centers are abundantly stocked with common prescription medications, remedies, and virus-testing equipment.
- Consultations and certain treatments are complimentary for respiratory illnesses should the need arise.

### DEDICATED PUBLIC HEALTH OFFICER

- Each ship has a dedicated Public Health Officer on board. This expert is responsible for the oversight of all outbreak prevention initiatives. They oversee the day-to-day sanitation and cleanliness of all public areas and accommodations.
- Each ship also has an Infectious Disease Prevention Officer on board.

### DEBARKATION SCENARIOS

- We have developed a thorough mobilization and response plan focused on providing medical treatment, collaborating with local authorities and coordinating safe passage home for all guests and crew should the need arise.
- We have established relationships with onshore medical institutions and enhanced our telemedicine consultation capabilities.

### SAILSAFE™ GLOBAL HEALTH AND WELLNESS COUNCIL

Regent has established its own company-specific expert panel, the SailSAFE™ Global Health and Wellness Council chaired by Dr. Scott Gottlieb, former Commissioner of the U.S. Food and Drug Administration, to assist in the implementation of and compliance with the SailSAFE™ health and safety program across the Company's operations and to continuously evaluate and identify ways to improve these standards after cruise voyages resume.
